Azrieli Group

BUSINESS CARD

Azrieli Group is focused on the income-producing real estate sector and is Israel's largest real estate company.

In the shopping mall sector, the Group holds several leading malls, including Azrieli Jerusalem mall, Azrieli Ayalon mall and Azrieli Tel Aviv mall. The Company also holds and manages office properties, including some of the most prominent in Israel, such as the Azrieli Tel Aviv Center and Azrieli Sarona tower. The Company also operates in the senior housing sector and manages three active senior homes. In the United States, the Company holds several office buildings, mainly in Houston and Austin, Texas, and has recently invested in a company operating mainly in the Data Centers industry in North America.

Azrieli Group has an extraordinary pipeline of hundreds of thousands of square meters of office, retail and senior housing space in projects under development or in planning stages, which will contribute significantly to the Group's future growth. In addition, we constantly invest in the preservation of the quality and value of our current property portfolio.

In addition to its real estate business, the Group has other holdings and activities: The Azrieli.com e-commerce platform; Supergas gas company which markets alternative energy sources (for details on the signing of an agreement for the sale of the Company's holdings in Granite Hacarmel which wholly owns Supergas, see Section 1.2.3.4 below); and GES, a water, wastewater treatment and chemicals company. The Company also has a financial holding in Bank Leumi (approx. 3.1%). The holding in Leumi Card was sold during February 2019, as stated in Section 1.2.3.2 below.

Azrieli Group's financial strength puts it in a class of its own among real estate companies. The Company operates with low leverage, at a net debt to assets ratio of a mere 27% (on an extended standalone basis). We target the best locations for our properties, to provide good transportation access over time and form a significant part of their urban environment. The location and quality of the properties are planned to serve as the best platform for our malls' tenants and visitors. As Israel's leading and strongest real estate group, Azrieli Group intends to continue its real estate work, and lead the development and management of high-quality, modern and innovative income-producing properties in Israel and overseas.

We will act together in continuing to focus on the Group's core business, while investing in new growth engines and application of advanced technologies.

1.2. Key Figures from the Description of the Corporation's Business

1.2.1. Summary of Operating Segments for the Six and Three Months Ended June 30, 2019

During the Report Period and as of the Report Release Date, the Azrieli Group continued to focus its business operations on various real estate sectors, primarily on the retail centers and malls in Israel segment and the leasable office (and other) space in Israel segment, as well as on the income-producing property overseas segment (mostly in the U.S.). The Company has also been active in the senior housing segment, the Granite segment (which mainly consists of the marketing of alternative energy sources and the treatment of water, wastewater, air, waste and industrial chemicals), as well as E-Commerce. In addition, the Company holds minority interests in a financial corporation. The Group's primary growth engine is the development of income-producing real estate projects: malls, offices and senior housing. As of the Report date, the Company has eleven projects in Israel in various development stages, the planned area of which is approx. 690 thousand sqm, as well as land for development. A brief description of the Group's five reported operating segments, as well as its additional activities ("Others") follows:

1. Retail centers and malls in Israel – The Group has 17 malls and retail centers in Israel;

2. Leasable office and other space in Israel – The Group has 14 income-producing office properties in Israel;

3. Income-producing properties in the U.S. – The Group has 8 office properties overseas, mainly in the U.S.;

4. Senior housing – The Group has 3 active senior homes in Israel;

5. Granite – The Group holds marketing activity in alternative energy sources; and activity in the treatment of water, wastewater and chemicals³.

Additional activities – The Group holds an E-Commerce business through the Azrieli.com website, as well as interests in a financial corporation: approx. 3.1% of the shares of Bank Leumi Lelsrael Ltd. ("Bank Leumi") as of the Report Release Date. By February 25, 2019, it held 20% of the shares of Leumi Card Ltd. ("Leumi Card")⁴. In July 2019, the Company (indirectly) invested in Compass, whose main activity is data centers in North America. For details on such investment, see Section 1.2.3.3 below.

³ The Group, through Granite Hacarmel Investments Ltd. ("Granite" or "Granite Hacarmel"), holds 100% of the rights in Supergas Israeli Gas Distribution Company Ltd. ("Supergas"), which markets alternative energy sources; and 100% of the rights in G.E.S. Global Environmental Solutions Ltd. ("GES"), the business of which is the treatment of water, wastewater, air, waste and industrial chemicals. For details with respect to an agreement for the sale of all of the Group's holdings in Supergas through the sale of Granite, see Section 1.2.3.4 below.

⁴ For details regarding the sale of all of the Group's holdings in Leumi Card, see Section 1.2.3.2 hereof.

1.2.2. Breakdown of Asset Value by Operating Segment

The following chart presents a breakdown of the total balance sheet assets by operating segment:⁵

Breakdown of Total Balance Sheet Assets by Operating Segment			Percentage of Segment Assets out of Total Assets	
As of	30.6.2019	31.12.2018	30.6.19	
Retail centers and malls in Israel	12,765	12,682		
Leasable office and other space in Israel	10,824	10,443		
Income-producing properties in the U.S.	2,484	2,593		
Senior housing	2,135	2,081		
Granite	1,244	1,225		
Others and adjustments	3,724	2,871		
Total	33,176	31,895		

Figures are presented in millions of NIS.

The retail centers and malls segment constitutes approx. 38% of the total balance sheet assets. The other income-producing real estate segments, in the aggregate, constitute nearly 47% of the total balance sheet assets. In the Company's estimation, the relative share of retail centers and malls is expected to decrease over time, in view of the Group predominantly focusing its development efforts in the coming years on the office and senior housing segments.

1.2.3. Summary of the Main Developments during and after the Report Period

1.2.3.1. Winning of a Tender for the Construction of a Facility for Waste Sorting and Recycling and Energy Production in the Rishon LeZion Area

In April 2018, notice was received by Zero Waste Ltd. ("Zero Waste"), a corporation held by GES in equal shares with Shikun & Binui ("Shikun & Binui"), whereby Zero Waste was the chosen winner of a BOT tender for the planning, funding, construction and operation of a facility for the sorting and recycling of municipal waste and energy production (the "Project"), which was issued by the Ministry of Finance (the Accountant General) and the Ministry of Environmental Protection. The Project will be built in the area of the Dan Region Wastewater Treatment Plant (the *Shafdan*) in Rishon LeZion and its cost during the construction period is estimated at approx. NIS 750 million. The execution of the Project is subject to the completion of a financial closing of the Project. In July 2018, the Company updated that Zero Waste received a petition of another group that contended in the same tender, in which the Jerusalem District Court is moved, *inter alia*, to reverse the Tender Committee's decision to choose Zero Waste as the winner of the tender, and determine that the other group is the winner of

⁵ The Company applied IFRS 8 – Operating Segments in its financial statements.

the tender, or alternatively remand the case to the Tender Committee to review Zero Waste's compliance with the tender's requirements. On February 14, 2019, the Court's decision was given, denying the petition with no award of costs. For further details, see the Company's immediate reports of July 2, 2018 (Ref: 2018-01-058617) and of February 14, 2019 (Ref: 2019-01-013639), which are incorporated herein by reference.

1.2.3.2. Sale of the Company's Holdings in Leumi Card

The Company entered into an agreement with Bank Leumi for the sale of all of the its holdings in Leumi Card to a corporation controlled by the investment fund Warburg Pincus for the consideration of NIS 2,500 million (in this section: the "Agreement"). The Company's share in the proceeds is NIS 500 million (subject to adjustments). On February 25, the transaction was closed and the consideration for this stage was received, in accordance with the provisions of the Agreement. For further details, see the Company's immediate reports of July 28, 2018, of October 29, 2018, of December 3, 2018, of February 4, 2019, of February 14, 2019 and of February 25, 2019 (Ref.: 2018-01-069771, 2018-01-101721, 2018-01-117489, 2019-01-012261, 2019-01-013513 and 2019-01-016348 respectively), which are incorporated herein by reference.

1.2.3.3. Investment in the Compass Company

In July 2019, Azrieli Data Centers LLC, an (indirectly) wholly-owned subsidiary of the Company (in this section: the "Buyer") entered into an investment agreement (in this section: the "Agreement") with Compass Holdco, LLC, a Delaware corporation ("Compass"), and in an operating agreement with the unit holders in Compass. The main business of Compass is data centers in North America. Compass owns active sites and additional sites under construction and development. The said transaction, in which the Buyer made an investment in the unit capital of Compass, was closed and the consideration therefor was paid by the Buyer to Compass. The Buyer has invested in Compass' equity and holds approx. 20% of the unit capital of Compass (the "Initial Investment"). The Buyer has an option to make additional investments and increase its holdings in Compass up to approx. 33% according to the price per unit in the Initial Investment. At the closing of the transaction, the Buyer paid Compass approx. U.S. \$135 million in respect of the Initial Investment. For further details, see the Company's immediate report of July 18, 2019 (Ref.: 2019-01-073885), which is incorporated herein by reference.

1.2.3.4. Engagement in an Agreement for the Sale of Granite Hacarmel

Further to the Company's reports whereby it intends to focus on the core areas of the real estate business, on July 25, 2019, Canit Hashalom Investments Ltd., a wholly-owned subsidiary of the Company (in this section: the "Seller"), together with Granite, which holds the entire issued and paid-up share capital of Supergas, entered into an agreement (in this section: the "Agreement") with Elco Ltd. (in this section: the "Buyer"), for the sale of all of the Seller's holdings (100%) in Granite to the Buyer (the "Transaction").

In consideration for all of the Seller's holdings in Granite, the Buyer shall pay the Seller NIS 1,017 million, minus the net financial debt of Granite, Supergas and its subsidiaries as of the closing date (which is estimated, as of October 31, 2019, at approx. NIS 250 million) (in this section: the "Consideration"). The Buyer paid the Seller NIS 10 million, as an advance on account of the Consideration. Insofar as the Transaction is not closed by October 31, 2019, the Buyer shall pay the Seller another NIS 40 million on account of the Consideration. On the closing date, the Buyer shall pay the Seller the balance of the Consideration, net of NIS 250 million (the "Deferred Consideration"). The amount of the Deferred Consideration will be paid by the Buyer to the Seller in 7 unequal annual installments, starting 12 months after the closing of the Transaction contemplated in the Agreement. To secure the Deferred Consideration payments, the Buyer shall pledge to the Seller, by a first-ranking fixed charge, 80% of the share capital of Supergas, the rate of which will be gradually decreased in accordance with the mechanism set in the Agreement.

The Transaction does not include all of Granite's holdings and assets other than Supergas, its subsidiaries and assets related to any of them, nor does it include liabilities that are not attributed to Supergas and the subsidiaries of Supergas. The Agreement stipulates several closing conditions, primarily consisting of the receipt of approval from the Competition Commissioner, approval by the Ministry of National Infrastructures, Energy and Water and/or the Natural Gas Authority and approvals by third parties. The parties intend to close the Transaction by October 31, 2019. However, insofar as not all of the regulatory approvals specified in the closing conditions of the Agreement are received by such date, the period of time for the closing of the Transaction shall be automatically extended until December 31, 2019. Insofar as such approvals are not received by such date either, each one of the parties may extend the period of time for the closing of the Transaction until March 31, 2020. In the Company's estimation, as of the report date, the Transaction, if and to the extent closed, is expected to have a material effect on its results. Insofar as the Transaction is closed on October 31, 2019 and the full Consideration is received, the Company will record an estimated (after tax) profit of approx. NIS 355 million. On August 5, 2019, an approval was received for the Transaction from the Competition Commissioner, under no conditions.

For further details with respect to the Transaction and the Agreement, see the Company's immediate reports of July 21, 2019, July 28, 2019 and August 6, 2019 (Ref.: 2019-01-062856, 2019-01-077500 and 2019-01-081517 respectively), which are incorporated herein by reference.

2 | INCOME-PRODUCING REAL ESTATE

2 |

2.1. Business Environment

In the estimation of the Company's management, there has been no material change in the business environment in which it operates, as described in Section 6 of Chapter A of the Periodic Report for 2018.

The Group's aforesaid estimations with regards to the changes in the income-producing real estate sector in Israel and their effect on the Group's results are merely subjective estimations and constitute forward-looking information as defined in the Securities Law, 5728-1968 (the "Securities Law"). Actual results and effects may materially differ from the aforesaid estimations and what they imply, for various reasons, including the further intensification of competition, a decline in demand and a deterioration of the Israeli economy.

2.2. Consolidated GLA Data

As of June 30, 2019

■ Malls and retail space - Israel ■ Offices and others - Israel ■ Income-producing real estate overseas (mainly the U.S.) ■ Senior housing

Figures represent thousands of sqm.

2.3. Average Occupancy Rates in the Income-Producing Properties

Following are the average occupancy rates in the Group's income-producing properties by operating segments as of June 30, 2019:

- Retail centers and malls in Israel – approx. 98%;
- Leasable office and other space in Israel – approx. 98%;
- Income-producing properties in the U.S. – approx. 79%;
- Senior housing in Israel – approx. 99%¹¹.

2.4. NOI of the Properties

Net Operating Income (NOI) is a measure that presents the net operating income of the properties: income after the deduction of the property's operating expenses and prior to the deduction of taxes and interest. It serves as one of the important parameters in the valuation of income-producing real estate companies, as its division by the appropriate cap rate for the properties provides an indication for the determination of the value of the income-producing properties¹². In addition, after deduction of the current maintenance expenses incurred to preserve the property's condition, NOI is used to measure the free and available cash flow for the service of financial debt undertaken for the purpose of funding the purchase of the property.

We wish to emphasize that these parameters do not present cash flows from current operations according to generally accepted accounting principles, nor do they reflect cash available for the funding of all of the Group's cash flows (including its ability to make distributions), and they are not meant to be deemed as a substitute for net profit in the evaluation of the results of the Group's operations.

¹¹ Excluding areas in properties whose construction has been completed and for the first time are in lease-up stages.

¹² Additional indications are, for example: The market value of similar properties in the same area and the sale prices of similar properties in recent transactions.

2.4.1. NOI Data

For the purpose of calculating the NOI, on the revenues side – all proceeds from tenants are taken into account (including rent, management fees and other payments), and for the purpose of calculating the costs – all operating expenses in respect of the properties are taken into account (including management, maintenance and other costs).¹³

The NOI figures for the income-producing real estate portfolio are as follows:¹⁴

- Retail centers and malls in Israel
- Leasable office and other space in Israel
- Income-producing properties in the U.S.
- Senior housing

Figures are presented in millions of NIS.

For explanations with respect to the change in NOI, see Sections 2.9, 2.10, 2.11 and 2.12 below.

¹³ The Group prepares its financial statements based on international standardization, and consequently, in the calculation of the cost of leasing and operating the properties classified as investment properties, depreciation was not taken into account. Furthermore, for the purpose of calculating the aforesaid parameters, profit from the revaluation of properties was not taken into account.

¹⁴ Including properties from the segments: retail centers and malls in Israel; leasable office and other space in Israel; income-producing properties in the U.S.; and senior housing.

2.4.2. Same-Property NOI Data

The NOI indicator is affected by changes in the portfolio. That is to say, the sale of a property or the addition of a new property to the Company's portfolio is reflected in a change in the NOI. Contrarily, the Same-Property NOI indicator discounts such changes and allows for an examination of changes in the profitability of the same portfolio of the Group over time. For the purpose of calculation thereof, only properties that were part of the Group's portfolio throughout the analysis period are taken into account. In the Report Period and the same period last year, this measure was as follows:

Figures are presented in millions of NIS.

2.5. Extended Standalone Statement – the Income-Producing Properties Business

The Company's management acknowledges the importance of transparency to investors, shareholders, bondholders and analysts, and views all of them as its partners. The Company has thus decided to adopt a policy, whereby the board of directors' report will include disclosure of a summary of the Company's extended standalone financial statements, i.e., a summary of the Company's consolidated balance sheets and income statements presented according to the IFRS rules, excluding the Company's investments in Granite Hacarmel and Azrieli E-Commerce Ltd. ("Azrieli E-Commerce"), which are presented based on the equity method *in lieu* of consolidation of their statements with the Company's statements (the other investments are presented with no change to the statement presented according to the IFRS rules). The Company's management believes that this statement adds extensive information, which assists in the understanding of the real estate business's vast contribution to the Company's total profit, while discounting material items in the consolidated financial statements that stem from the consolidation of Granite Hacarmel and Azrieli E-Commerce, such as trade receivables, inventory, sales and more.

The extended standalone statement is attached hereto as Annex B. Such statement is neither audited nor reviewed by the Company's accountants.

2.6. Weighted Cap Rate

The following table shows the calculation of the weighted cap rate derived from all of the Group's income-producing real estate, excluding senior housing¹⁵, as of June 30, 2019:

Calculation of the Weighted Cap Rate for the Report Period	
Total investment properties in the "Extended Standalone" statement ⁽¹⁾	28,008
Net of value attributed to investment properties under construction	(2,665)
Net of value attributed to land reserves	(496)
Net of value attributed to income-producing senior housing	(1,689)
Total value of income-producing investment properties (including the fair value of vacant space)	23,158
Actual NOI in the quarter ended June 30, 2019 (excluding senior housing)	390
Additional future quarterly NOI ⁽²⁾	32
Total standardized NOI	422
Proforma annual NOI based on the standardized NOI (excluding senior housing)	1,688
Weighted cap rate derived from income-producing investment properties (including vacant space) ⁽³⁾	7.3%

Financials are presented in millions of NIS.

- (1) Extended Standalone Statement – See Annex B to this chapter. The figures are based on an update to the valuations as of June 30, 2019. The figure includes receivables that appear under the balance sheet item "Loans and Receivables" for averaging attributed to real estate.
- (2) The figure mainly includes estimates of additional NOI for vacant space not yet occupied, space occupied and to be occupied during 2019 under a whole-year lease in respect of which value was recorded in the update of the valuations as of June 30, 2019 (the sums under this item are chiefly for the lease-up of the offices at Azrieli Sarona Center in Tel Aviv, at Azrieli Holon Center and for the Company's properties overseas).
- (3) Standardized annual NOI rate out of total income-producing investment properties (including vacant space). This figure does not constitute the Company's NOI forecast for 2019 and its entire purpose is to reflect the NOI assuming full occupancy for a whole year of all income-producing properties.

The Company's estimations referred to in this section include forward-looking information as defined in the Securities Law. This information is uncertain and is based, inter alia, on information pertaining to contractual engagement with tenants as of the Report date, parameters in the calculation of fair value and the Company's estimations regarding space occupancy. The actual results may vary materially from the foregoing estimations and the implications thereof, for various reasons, including immediate cancelation of lease agreements or a business crisis of any one of the tenants, or a change in the fair value parameters or non-meeting of the development or occupancy targets.

¹⁵ Since the value of senior housing properties is derived from the FFO indicator, rather than the NOI indicator, such properties were not included in this calculation. The weighted senior housing cap rate as of the Report Release Date is 8.75%.

2.7. Real Estate Business FFO

Funds from Operations (FFO) is a measure that presents the cash flow from the real estate business. It is commonly used worldwide and provides a proper basis for the comparison of income-producing real estate companies. This indicator reflects income from net profit, discounting revenues and expenses of a capital nature and adding the Company's share in real estate depreciation and other amortizations.

This report presents the FFO indicator in respect of the Group's income-producing real estate business.

It should be stressed that the FFO indicator does not reflect cash flow from current operations according to generally accepted accounting principles, nor does it reflect cash held by the Company and its ability to distribute the same, and it is not a substitute for the reported net profit. It is further clarified that this indicator is not a figure audited by the Company's accountants.

2.8. The EPRA (European Public Real Estate Association) Measures

The Azrieli Group is the only Israeli real estate company included in the EPRA Indexes. EPRA is an organization that brings together the public income-producing real estate companies in Europe. Being listed in the EPRA measures provides the Azrieli Group greater exposure to international investors, according to its weight in the index.

In view thereof, the Group has decided to adopt the position paper published by EPRA with the purpose of improving the transparency, uniformity and comparability of financial information reported by real estate companies listed in the index. A report regarding two financial measures calculated according to such position paper follows.

It is emphasized that the following measures exclude the component of expected profit from projects under construction not yet recorded in the financial statements.

These figures do not constitute a valuation of the Group, are not audited by the Group's accountants and are not a substitute for the figures contained in the financial statements.

2.8.1. EPRA NAV

The EPRA NAV (Net Asset Value) is a measure that reflects the Group's net asset value on an ongoing, long-term basis, assuming no disposal of real estate, and thus requires certain adjustments, such as presentation according to the fair value of assets that are not so presented in the financial statements and the exclusion of deferred taxes resulting from the revaluation of investment properties.

It is noted that all development pipeline are included at their present value, i.e., based on historic cost including investments in the properties, and no value is attributed to future revenues from such properties when occupied and producing income.

2.9. Retail Centers and Malls in Israel Segment

The Azrieli Group owns and manages a portfolio of high-quality malls and retail centers throughout the country, which are located in city centers, with convenient access to transportation and often in proximity to train stations. The Company takes a long-term view with respect to its properties, from the stage of locating the land, through the stage of development and construction of properties, to the holding, management and betterment of the properties over years.

The Group's malls are mostly characterized by the following:

- Diverse and changing mix – the malls segment has a dynamic retail mix that is renewed according to the market needs and public preferences. For example, malls were once characterized by significant presence of supermarkets or electronics stores, whereas today the tenant mix in malls has changed. In fashion it is evident that new brands periodically take the place of those which have become less relevant, with international fashion chains becoming more dominant in the market than local brands. The high-quality property portfolio, and the management thereof, grant the Company an advantage which enables it to get leading international fashion brands and to open their flag stores in the Group's malls.
- A trend of increased store space – increased retail space is recently demanded by international brands, followed by domestic ones, which seek to combine complementing brands in one store in order to expand the product mix and create an improved customer experience, while increasing the sales.
- Malls as entertainment venues – the Company acts to improve the entertainment and dining experience in the mall, through a selection of restaurants and cafés in the malls and renovation of the fast food courts, modern design and added crowd-attracting entertainment options such as the "Zappa" club. The Group further acts to create family entertainment and service spaces in its malls, including play areas, diaper changing and nursing rooms.
- Innovation – in recent years the Company has been implementing technological improvements into the shopping experience and striving for leadership and innovation in the mall segment, including by way of creating a unique application which grant exclusive discounts to mall attendants and enables direct marketing based on customer preferences. The goal of technological innovation is to enhance customer experience in the mall while combining both digital and physical worlds.

The retail areas in Azrieli Group's malls and retail centers are leased to some 1,900 tenants.

E-Commerce activity – An additional layer of the Group's activity in the digital world is the Azrieli.com website. The website provides an e-commerce platform that integrates into and strengthens the activity of the malls and retail centers through online activity by way of an integrated sale, such as giving the option to order online and collect the product at the Group's malls ("Click & Collect").

Performance of the retail centers and malls in Israel segment and changes in value

The Azrieli Group has 17 malls and retail centers in Israel with a total GLA of approx. 337 thousand sqm.

Balance of the properties of the retail centers and malls in Israel segment – The balance totaled approx. NIS 12.8 billion as of June 30, 2019, compared with approx. NIS 12.7 billion on December 31, 2018. The change mainly derives from investments in the segment's properties.

Change due to adjustment of the fair value of the segment's investment properties and investment properties under construction – Profit from fair value adjustment of the segment's investment properties and investment properties under construction in the Report Period totaled approx. NIS 15 million, compared with a loss of approx. NIS 41 million in the same period last year. The properties are presented according to an update to the valuations prepared by an independent appraiser as of June 30, 2019.

The table below presents a summary of the business results of the retail centers and malls in Israel segment:

Figures are presented in millions of NIS.

Same-Property NOI in the retail centers and malls in Israel segment is affected by changes in the rent which sometimes derive from a varying mix and the size of the stores, from interim periods of tenant substitutions and from changes in the operating expenses.

2.10. Office Segment

The Company's portfolio of properties of leasable office space mostly consists of office towers classified as Class A properties, which are located mostly in CBDs, in proximity to major traffic arteries in the heart of the city. The location, quality and positioning of the office space enable the Company to maintain high occupancy rates, and over time increase the rent. The Company develops and builds office projects in significant scopes, which meet the international standards of employment centers in the world's largest cities, in all aspects pertaining to the management of the property and the quality thereof. Furthermore, the Company has leasable office areas which are part of malls, in which small tenants offer services to the public (e.g. medical institutes, health funds and independent service providers). The combination of offices and retail increases customer traffic in these properties.

The Company's leasable office space properties are mostly characterized by the following:

- Positioning – among the Company's properties are projects which are considered to be leading and very significant in the field of leasable office spaces in Israel, and are an icon in Israeli landscape in general, and in Tel Aviv in particular, such as the Azrieli Tel Aviv Center and the Azrieli Sarona Tower.
- Location – the Company engages in the development of leasable office spaces and acts to locate and build its properties in this segment in areas which enjoy a high demand for offices. The Company's projects are mostly located in the heart of Israel's CBDs and in proximity to city centers and are characterized by convenient access by both private and public transportation. For example, the Company has several projects in Tel Aviv's northern CBD with both income-producing projects and projects under development and construction.
- Large floors – the Company's property portfolio includes a number of projects that can offer large floor spaces. These projects can meet the growing demand by large companies that are interested in creating one

central site for employees, and their spread over a smaller number of floors. The planning of the Azrieli Sarona project and the Azrieli Holon center, for example, enables tenant to unite several sites which were previously spread across the country.

- Building standard – the Group persistently applies high building standards to all of its properties, as expressed in the architectural design, the properties' functionality and the meticulous attention to high building qualities as well as to details such as new and fast elevators, advanced lighting and more. This is rooted in the long-term vision of properties that will be owned and managed by the Group for many years to come.
- Operational efficiency - The size of the Company's properties leads to operational efficiency which is expressed, *inter alia*, in the ability to implement technological and infrastructural improvements including the installation of complex communication networks and Leed Certificate which enable large multinational which require compliance with strict standardization to lease spaces at the Company's properties.
- Management – all of the Group's leasable office spaces are managed by management companies which are subsidiaries of the Company and are committed to high service standard.

Azrieli's office spaces in Israel are leased to some 650 different tenants. In each one of the Group's properties, there is a mix of tenants coming from various sectors. Some of the Company's office tenants are domestic or international mega-companies.

2.10.1. Performance of the Leasable Office and Other Space in Israel Segment and Changes in Value

The Azrieli Group has 14 income-producing properties in this segment in Israel, with a total GLA of approx. 549 thousand sqm.

Balance of the Group's investment properties in the leasable office and other space in Israel Segment – The balance totaled approx. NIS 10.8 billion as of June 30, 2019, compared with approx. NIS 10.4 billion as of December 31, 2018. The change derives from both investments in the segment's properties and from fair value adjustments.

Change due to adjustment of the fair value of the segment's investment properties and investment properties under construction – The profit from such adjustment in the Report Period totaled approx. NIS 164 million, compared with a profit of approx. NIS 25 million in the same period last year. The properties are presented according to an update to the valuations prepared by an independent appraiser as of June 30, 2019.

The table below presents a summary of the business results of the leasable office and other space in Israel segment:

Summary of the Business Results of the Leasable Office and Other Space in Israel Segment							
	Rate of Change	For the Three Months Ended		Rate of Change	For the Six Months Ended		For the Year Ended
		30.6.2019	30.6.2018		30.6.2019	30.6.2018	31.12.2018
Revenues	12%	176	157	16%	350	303	633
NOI	13%	147	130	16%	291	250	517

Figures are presented in millions of NIS.

The increase in revenues and in NOI chiefly results from the continued lease-up of the offices at Sarona and Rishonim.

The following table presents the segment's NOI development:

Development of the NOI of the Leasable Office and Other Space in Israel Segment				
	For the Three Months Ended		For the Six Months Ended	
	30.6.2019	30.6.2018	30.6.2019	30.6.2018

NOI for properties purchased in 2018	1	1	3	1
Total NOI from all properties	147	130	291	250

Figures are presented in millions of NIS.

During the Report Period, same-Property NOI in the leasable office and other space in Israel segment was primarily positively affected by the continued lease-up of the offices at Sarona, Rishonim and Azrieli Holon center and by a real increase in rent when renewing contracts for the various properties (due to the exercise of options by tenants and/or the execution of new contracts), and was adversely affected by interim periods of tenant replacement and by changes in operating expenses.

2.11. Senior Housing Segment

The acquisition of land in Modi'in in 2014 marked the Group's entry into the senior housing segment, which was followed in 2015 by the purchase of an existing senior home – Palace Tel Aviv, one of the most luxurious homes in Israel. Since the purchase of Palace Tel Aviv, the Group has been operating under the brand "Palace" for the continued successful operation and betterment of the three active senior homes, Palace Tel Aviv, Palace Ra'anana and Palace Modi'in (the construction of which was completed in Q3/2018) as well as for the development of two additional projects, which are in various stages of development and construction in Lehavim and Rishon LeZion.

2.11.1. Performance of the Senior Housing Segment and Changes in Value

As of the Report Release Date, the Azrieli Group has three active senior homes with aboveground built-up areas of approx. 76 thousand sqm (excluding areas which are attributed to the LTC unit and to retail areas), which include approx. 800 senior housing units as well as two projects under development and construction in Lehavim and in Rishon Lezion, in which approx. 600 residential units in a total area of approx. 60 thousand sqm (excluding areas which are attributed to the LTC unit and to retail areas) will be built. The Company is also promoting a zoning plan for additional rights, including for senior housing, in the Azrieli Jerusalem mall. For further details, see Section 4.1.2 of the board of directors' report in the periodic report of 2018, which is incorporated herein by reference, and Section 4 of Chapter B hereof – Updates to the Description of the Corporation's Business Chapter as of June 30, 2019.

Balance of the Group's segment properties in the senior housing segment – This balance totaled approx. NIS 2.1 billion as of June 30, 2019, similar to the balance of December 31, 2018.

Change due to adjustment of the fair value of the segment's investment properties and investment properties under construction – Profit from fair value adjustment of the segment's investment property and investment property under construction in the Report Period totaled approx. NIS 6 million. The Company did not derive profit from fair value adjustment of the segment's investment property and investment property under construction in the same period last year. The properties are presented according to an update to the valuations prepared by an independent appraiser as of December 31, 2018.

The table below presents a summary of the business results of the senior housing segment:

Summary of the Business Results of the Senior Housing Segment							
	Rate of Change	For the Three Months Ended			For the Six Months Ended		For the Year Ended
		30.6.2019	30.6.2018	Rate of Change	30.6.2019	30.6.2018	31.12.2018
Revenues	22%	39	32	19%	75	63	130
NOI	(9%)	10	11	(5%)	19	20	37

Figures are presented in millions of NIS.

The increase in revenues and decrease in NOI chiefly results from the opening of Palace Modi'in during 2018. Due to the gradual occupancy, there is an operating loss that will be balanced out as residents continue to move in to Palace Modi'in.

The Company's estimation referred to in this section includes forward-looking information as defined in the Securities Law. This information is uncertain, and is based, inter alia, on occupancy rates of other Palace projects. The actual results may vary materially from the foregoing estimation and the implications thereof, for various reasons, including non-meeting of the occupancy targets of Palace Modi'in.

The following table presents the senior housing segment's NOI Development:

	Development of the NOI of the Senior Housing Segment			
	For the Three Months Ended		For the Six Months Ended	
	30.6.2019	30.6.2018	30.6.2019	30.6.2018

Figures are presented in millions of NIS.

2.12. Income-Producing Properties in the U.S. Segment

2001 marked the beginning of the Azrieli Group's diversification of its investments in income-producing real estate overseas. In recent years the Group has expanded its activity significantly through the acquisition of office buildings in Houston and in Austin, Texas.

2.12.1. Performance of the Income-Producing Properties in the U.S. Segment and changes in Value

As of the Report date, Azrieli Group has 8 income-producing properties in this segment, mostly in the U.S. with a total GLA of approx. 246 thousand sqm (on a consolidated basis) and approx. 236 thousand sqm (the Company's share) leased to some 250 tenants.¹⁶

Balance of the Group's investment properties in the segment – This balance totaled approx. NIS 2.5 billion as of June 30, 2019, compared with approx. NIS 2.6 billion on December 31, 2018. The change mainly derives from the decrease in the exchange rate of the dollar as of June 30, 2019 compared with December 31, 2018.

¹⁶ The "Company's share" – net of minority interests in certain companies.

Change due to adjustment of the fair value of the segment's investment properties – The loss from such adjustment in the Report Period totaled approx. NIS 7 million, similar to the loss recorded in the same period last year.

The table below presents a summary of the business results of the income-producing properties in the U.S. segment:

Summary of the Business Results of the Income-Producing Properties in the U.S. Segment							
	Rate of Change	For the Three Months Ended		Rate of Change	For the Six Months Ended		For the Year Ended
		30.6.2019	30.6.2018		30.6.2019	30.6.2018	31.12.2018
Revenues	11%	69	62	14%	141	124	267
NOI	6%	36	34	10%	76	69	149

Figures are presented in millions of NIS.

The increase in revenues and in NOI chiefly results from the fact that during 2018, the Group acquired an office building in Austin, Texas, U.S.A., offset by the effect of changes in occupancy in some of the properties.

The following table presents the segment's NOI Development:

Development of the NOI of the Income-Producing Properties in the U.S. Segment

As part of the zoning plan, the Company was required to approve an architectural design and development plan for the project, as a condition for an above-ground building permit. The Company also undertook to allocate from the said rights in the project a public floor for the Tel Aviv-Jaffa Municipality, as well as undertook to pay and perform various tasks in the vicinity of the project, including in Azrieli Center. The Company intends to construct retail space that will serve to expand the existing mall and a multi-story tower, the Spiral Tower. The land is located in proximity to the Azrieli Holon Center, on which it is planned to build a very large employment and commerce project, which will consist of approx. 250,000 sqm of leasable office space and a family-friendly entertainment and shopping complex. The project is in proximity to central traffic arteries.

Land in Petach Tikva – The land, which was purchased in November 2017, of an area of 19,000 sqm, is situated in the eastern part of the Kiryat Aryeh Industrial Zone in Petach Tikva, near an existing office project owned by the Group. The Company's management is acting to continue leading the income-producing real estate market, *inter alia* through the purchase of land reserves, the expansion of existing properties and the purchase of additional similar properties as aforesaid, in order to bring to a further increase in the Company's future operating cash flow, insofar as the Company's board of directors shall so deem fit, and to further consider the development of related and/or synergistic segments.

Betterment of income-producing properties

Another growth engine of the Company is the betterment of its existing properties. The Company also examines, from time to time, options to promote zoning plans for additional building rights in its properties. For details with respect to the Company's activities for the betterment of its existing properties, see Section 4.1.2 of the board of directors' report for the Periodic Report for 2018, which is incorporated herein by reference, and in Section 4 of Chapter B hereof – updates to the Description of the Corporation's Business chapter as of June 30, 2019.

4.1.2. Identification and Acquisition of Properties in the Company's Operating Segments

For details with respect to the Company's activities for the identification of properties in the Company's operating segments, see Section 4.1.3 of the board of directors' report for the Periodic Report for 2018, which is incorporated herein by reference.

4.1.3. E-Commerce Business

Further to the Company's reports, whereby it continues to examine business opportunities related to the expansion of its operations to additional segments that coincide with its business strategy, while creating an additional growth engine, the Company owns and operates the Azrieli.com website. The website provides an e-commerce platform, aiming to integrate into and boost the malls and retail centers business through online activity and by way of combined sales and creation of consumption experience, alongside the development of its core business in traditional retail.

5.1. Leverage Ratio of the Group

The following table presents a summary of balance sheet figures out of the consolidated financial statements:

Summary of Balance Sheet Figures out of the Consolidated Statements			
	30.6.2019	30.6.2018	31.12.2018

Equity attributable to the Company's shareholders out of total assets (in %)	52%	52%	54%
Net debt to assets (in %)	28%	29%	29%

Figures are presented in millions of NIS, unless otherwise noted.

The Group funds its business operations primarily out of its equity, cash and cash equivalents and by means of non-bank credit (mainly bonds and loans from institutional bodies), bank credit (short-term and long-term) and commercial paper. In the Report Period the Company made a public offering of a new Series E-F bond issuance.

The Group's financial soundness, which is characterized by a low leverage ratio and considerable unencumbered assets, affords the Group available sources for the obtainment of financing on convenient terms¹⁸. The Group's leverage ratio is low, compared to many of its major competitors. The Group's low leverage ratio, joined with the Company's extensive initiatives in the real estate sector, provide flexibility also at times of crisis.

¹⁸ For further details, see Section 19 of Chapter A of the Periodic Report for 2018, which is incorporated herein by reference.

5.2. Composition of Financing Sources

The Group has three principal debt channels: bank debt, private loans from institutional bodies or public bonds. The Group currently enjoys very high accessibility to each of these financing channels.

The following chart presents a breakdown of the rate of borrowed capital in the Company's total capital, as well as a breakdown thereof by type:

Figures are presented in millions of NIS and as a percentage out of the total assets.

The increase in the total debt, in the sum of approx. NIS 1,029 million in the Report Period mainly stems from the issue of bonds in Q1/2019 net of current maturities of loans and bonds. As of the Report date, the Group, on a consolidated basis, has a working capital deficit of approx. NIS 0.7 billion, which derives, *inter alia*, from the Company's management's decision, at this stage, to fund its business also by means of short-term credit, in view of the business opportunity arising from the low interest rates on credit of this type.

The Group estimates that if it decides at any time to convert such credit into long-term credit, it will be able to do so in view of its financial soundness and/or the scope of its unencumbered assets. Therefore, in its meeting of August 13, 2019, the Company's board of directors, having examined the Company's cash flow and financing sources, determined that such working capital deficit does not affect its ability to timely repay its liabilities.

The Group's estimations mentioned in this Section 5.2 above of the board of directors' report in relation to its liquidity and the availability of its financing sources, particularly as pertains to the possibility of converting the short-term debt into long-term debt, are forward-looking information as defined in the Securities Law, which is based on the Company's assessments as to market developments, inflation levels and projected cash flows and on the conditions and possibilities of obtaining credit on the date of the Report. Such estimations may not materialize, in whole or in part, or may materialize in a manner that materially differs from the Company's estimations. The primary factors that may affect the above are: changes in the capital market affecting the conditions and possibilities of obtaining credit, changes in the Company's plans, including the use of future available liquid balances in order to seize business opportunities, changes in the advantageousness of the holding of various investment channels or the advantageousness of use of various financing channels, deterioration of the Israeli or U.S. economy and decline into severe recession, and the Company or any of the Group's companies encountering financing or other difficulties, in a manner affecting the Company's cash flow.

5.3. Financing Transactions during the Report Period and until the Report Release Date

During the Report Period, the Company raised debt at low interest rates, which are typical in the present market conditions, whilst maintaining the Company's high credit rating and extending the loans' debt duration.

The Company acted during the Report Period, to raise debt through the issuance of Series E and F Bonds in the scope of approx. NIS 1.5 billion, with an average duration of approx. 7.5 years and weighted index-linked interest of approx. 1.9%. For details on the debt raising see Section 1.2.3.50 above and Section 19.5 of Chapter A of the Periodic Report for 2018, which is incorporated herein by reference.

Reduction of Average Interest over the Years

◆ Interest rate as of the end of the period

Extension of the Average Duration of Debt

◆ Duration as of the end of the period

5.4. Rating

As of the Report date, the Company's credit rating is AA+/Stable/iIA-1+ by Ma'alot and Aa1 by Midroog. For details with respect to the rating of bonds, commercial paper and private loans of the Company, see Section 19.12 of Chapter A of the Periodic Report for 2018, which is incorporated herein by reference.

5.5. Liabilities and Financing

Below is a summary of the Group's financial liabilities (excluding Granite Hacarmel and Azrieli E-Commerce):

Breakdown of Financial Liabilities								
	Fixed Interest			Variable Interest		Total		Total
	Index-linked	USD-linked	Unlinked	GBP-linked	Unlinked	Fixed Interest	Variable Interest	
Short-term loans	-	-	-	19	421	-	440	440
Long-term loans	8,767	1,376	-	-	24	10,143	24	10,167
Total	8,767	1,376	-	19	445	10,143	464	10,607

Figures are presented in millions of NIS, as of June 30, 2019.

As of June 30, 2019, short-term loans represented approx. 4% of the Group's total financial liabilities (excluding Granite Hacarmel and Azrieli E-Commerce). The Company's management estimates that this rate is low and conservative in view of the low leverage ratio and the total unencumbered assets as specified below.

The Company's policy regarding the financing of its business, besides the positive and stable cash flow from current operations and current assets, is implemented primarily by taking long-term index-linked fixed-interest loans, in order to minimize market risks resulting from changes in the market interest rates and to counteract the market risk resulting from changes in the Consumer Price Index (CPI), while taking advantage of the fact that the Company's revenues are, for the most part, index-linked. However, in view of the low interest rates on short-term variable-interest loans, the Company's have decided to finance its operations also by means of short-term loans as specified above.

5.6. Designated Disclosure to Bondholders (of Series B-F)

For details with respect to designated disclosure to the holders of the Company's Series B-F Bonds, see Annex C to this chapter.

5.7. Maturities of the Group's Financial Liabilities

The following table presents the maturity dates and amounts of financial liabilities (excluding Granite Hacarmel and Azrieli E-Commerce):

Forecast of Maturities of Financial Liabilities			
Year	Principal	Interest	Total
1	1,595	187	1,782
2	1,370	160	1,530
3	894	125	1,019
4	844	113	957
5 forth	5,904	454	6,358
Total	10,607	1,039	11,646

Figures are presented in millions of NIS, as of June 30, 2019.

The sources for the funding of the Group's financial liabilities are chiefly the following:

- Positive cash flow from current operations, which totaled approx. NIS 816 million in the six months ended June 30, 2019.
- Liquid assets and unencumbered assets.
- The Group has mortgaged income-producing properties, the fair value of which significantly exceeds the loan undertaken therefor.
- Refinancing of debts in the capital market and/or institutional bodies and/or banks.

5.8. Unencumbered Assets Available to Serve as Collateral against the Receipt of Credit

As of June 30, 2019, the aggregate amount of liquid assets (cash and cash equivalents and short-term investments and deposits) held by the Group amounted to NIS 1,858 million. The Company deems its liquid assets, the considerable cash flow from its current operations and its unencumbered assets (in the total value of approx. NIS 22 billion, in addition to approx. NIS 1.9 billion of liquid means stated above) essential to its financial soundness, its high financial flexibility due to its lack of dependence on the availability of external sources both in terms of debt repayment and in terms of the ability to seize investment opportunities at various times.¹⁹ As pertains to additional possible liquid sources, the Group estimates that it has the ability to obtain financing on convenient terms in the prevailing economic conditions.

¹⁹ For details with respect to additional matters related to the Group's financing activities, see Section 19 of Chapter A of the Periodic Report for 2018, which is incorporated herein by reference.

Unencumbered Assets Available to Serve as Collateral against the Receipt of Credit

Assets	Value of Assets as of June 30, 2019
Real estate of the retail centers and malls in Israel segment	10,700
Real estate of the leasable office and other space in Israel segment	9,224
Other real estate (chiefly senior housing)	302
The Company's holdings in Azrieli E-Commerce	50
The Company's holdings in Granite Hacarmel	613
The Company's holdings in Bank Leumi	1,175
Total	22,064

Figures are as presented in the financial statements and in millions of NIS.

In addition, the Group holds mortgaged income-producing properties, the fair value of which exceeds the amount of the loan undertaken therefor.

The Group's estimations mentioned in this Section 5.8 above of the board of directors' report in connection with the Company's ability to obtain financing on convenient terms in the currently prevailing economic conditions, are forward-looking information as defined in the Securities Law, which is based on the Company's estimations as to the economic conditions and the liquidity level as of the Report Release Date. Such estimations may not materialize, in whole or in part, or may materialize in a manner that materially differs from the Company's estimations. The primary factors that may affect the above are: changes in the capital market affecting the conditions and possibilities of obtaining financing, changes in the Company's plans, including use of future available liquid balances in order to seize business opportunities, changes in the advantageousness of the holding of various investment channels or the advantageousness of use of various financing channels, deterioration of the Israeli or U.S. economy and decline into severe recession, in a manner which affects the Company's ability to obtain financing on convenient terms.

- (1) The increase chiefly results from growth in cash and cash equivalents as a result of bond raising in the Report Period.
- (2) The increase chiefly results from the increase in cash and cash equivalents as a result of bond financing in the Report Period, offset by the write-off of the investment in Leumi Card as a result of the sale thereof in the Report Period.
- (3) The increase results from the progress of the investments in projects under construction and in income-producing properties and from an increase in the fair value of the properties, offset by a decrease in real estate property in the U.S.A. as a result of a decrease in the exchange rate of the U.S. Dollar in the Report Period.

Net profit for the period attributable to the shareholders	332	236	701	495	1,218
Net profit attributable to the shareholders and to non-controlling interests	332	236	701	495	1,219

Comprehensive income to shareholders and non-controlling interests	358	268	659	545	1,325

Figures are presented in millions of NIS.

Net profit in the Report Period totaled NIS 701 million, compared with NIS 495 million in the same period last year. The profit in the Report Period was affected mostly by an increase of NIS 201 million compared with the same period last year, in profit from fair value adjustment, by an increase of NIS 51 million in NOI from the real estate activity and an increase of NIS 54 million from net other income offset by an increase in the financing expenses, net in the sum of NIS 52 million and from an increase in the tax expense, mainly due to the aforesaid in the sum of NIS 44 million.

6.2. Comprehensive Income

The Group's capital and comprehensive income are also affected by various capital reserves, chiefly by capital reserves in respect of changes in the fair value of investments in equity instruments designated at fair value through other comprehensive income and by reserves for translation differences from foreign operations. The difference between the comprehensive income and the net profit as presented in Section 6.1 above, for the six-month period ended June 30, 2019, derives from loss from translation differences from foreign operations of NIS 69 million, offset by an increase in the fair value of financial assets net of tax of NIS 27 million. With respect to the three-month period ended June 30, 2019, derives from loss from translation differences from foreign operations of NIS 29 million, offset by an increase in the fair value of financial assets net of tax of NIS 55 million.

6.3. Results of Operations

The following table presents the marketing, general and administrative expenses, other revenues, financing expenses and income taxes in the Report Period, compared with the same period last year:

Results of Operations				
	For the Three Months Ended		For the Six Months Ended	
	30.6.2019	30.6.2018	30.6.2019	30.6.2018

Net other revenues ⁽²⁾	5	12	88	34
Net financing expenses ⁽³⁾	161	103	178	126
Income taxes expenses ⁽⁴⁾	66	42	154	110

Figures are presented in millions of NIS.

- (1) The increase in expenses in the Report Period and in Q2, compared with the same periods last year, mainly derives from an increase in marketing expenses.
- (2) Net other revenues in the Report Period result mainly from dividends from Leumi Card and Bank Leumi similar to the same period last year. Other net revenues in the present quarter mainly derive from a dividend from Bank Leumi similar to the same quarter last year.
- (3) The increase in net financing expenses in the Report Period and in Q2 mainly derives from an increase in linkage expenses on loans, bonds and senior housing residents' deposits.
- (4) The increase in tax expenses in the Report Period and in the quarter compared with the same periods last year is attributed mainly to a change in deferred tax expenses due to the increase in profit from fair value adjustments of investment property in the present period compared with the corresponding periods offset by a decrease in current tax due to increase in the aforesaid financing expenses.

Note 2 – Significant Accounting Policies

A. The basis for the preparation of the financial statements:

The Group's condensed consolidated financial statements (“**Interim Consolidated Statements**”) were prepared in accordance with IAS 34 – Interim Financial Reporting (“**IAS 34**”).

In the preparation of these Interim Financial Statements the Group has applied the accounting policy, rules of presentation and methods of calculation identical to those used in the preparation of its financial statements as of December 31, 2018 and for the year then ended, except as stated in Note 2B.

The condensed consolidated financial statements were prepared in accordance with the disclosure provisions in Chapter D of the Securities Regulations (Periodic and Immediate Reports), 5730-1970.

B. Changes in accounting policy:

IFRS 16 “Leases”:

The new standard has superseded IAS17 “Leases” and the commentaries related thereto and provided the rules for recognition, measurement, presentation, and disclosure of leases with regards to both of the parties to the transaction, i.e. the customer (“**Lessee**”) and the supplier (“**Lessor**”). The standard has not changed the currently existing accounting treatment in the Lessor's books.

The new standard has cancelled the distinction that existed relating to a Lessee, between finance leases and operating leases and determined a uniform accounting model with regards to all types of leases. In accordance with the new model, for any leased asset, the Lessee is required on the one hand to recognize an asset for the right of use and on the other hand, a financial liability for the lease payment.

The directives on the recognition of an asset and liability, as aforesaid, shall not apply to assets which are leased for a term of up to only 12 months, and with regards to leases of low value assets (such as personal computers).

In view thereof, leases of the Group that were previously treated as operating leases in which the Company is the Lessee will be recognized from January 1, 2019, upon the application of the standard as assets and liabilities in the Group's statement of financial position.

The standard has taken binding effect for annual reporting periods as of January 1, 2019.

The Group does not apply the requirements of recognition of a right-of-use asset and a liability for leases whose term of lease ends within 12 months as of the date of initial application.

Note 2 – Significant Accounting Policies (Cont.)

C. Use of estimates and discretion:

- (1) In the preparation of the condensed financial statements in accordance with IFRS, the Group's managements are required to use discretion, evaluations, estimates and assumptions which affect the application of the policy and the amounts of assets and liabilities, revenues and expenses. It is clarified that the actual results may differ from such estimates.

The evaluations and discretion used by management to apply the accounting policy and prepare the Consolidated Interim Financial Statements were identical to those used in the preparation of the financial statements as of December 31, 2018.

- (2) Further to Note 3(c)(1) to the annual financial statements, as of June 30, 2019, the Group has updated the valuations for some of its investment properties in Israel (attributed to the retail centers and malls segment and to the office and other space for lease segment).

The valuations were prepared by an independent outside valuator having relevant professional skills.

The valuations for the investment and under construction properties were prepared mainly in the method of discounting the expected cash flows from the property.

The cap rates that were used by the appraiser mainly range between 6.75%-8%. The cap rates were determined in consideration of the type, designation and location of the property, the rent prices versus market price and the quality of the tenants.

With respect to the other properties, to the Company's estimation no material changes occurred in the value of the real estate relative to the previous valuation performed.

D. Rates of exchange and linkage basis:

- (1) Balances that are stated in foreign currency or linked thereto are recorded in the financial statements according to the representative exchange rates published by the Bank of Israel and which were in force on the end of the reporting period.

Pursuant to the resolutions of the Company's compensation committee and the board of directors of July 4, 2019, Ms. Naomi Azrieli ("**Naomi**") and Ms. Sharon Azrieli ("**Sharon**"), who are controlling shareholders of the Company, serving as directors therein, and who do not receive management fees, shall be entitled, for a period of three years starting from June 3, 2019, to the remuneration to which all of the other directors of the Company (who do not receive a salary or management fees) are entitled, i.e. – the maximum remuneration as will be determined under the Companies Regulations (Rules regarding Remuneration and Expenses for an Outside Director), 5760-2000 (the "**Remuneration Regulations**"), as the same will be updated from time to time and in accordance with the Company's rank, as being from time to time (in which context, the question of whether the director is an expert, in accordance with the definition of an expert outside director in the Remuneration Regulations, shall be taken into account).

In addition, the provisions of Section 5(b) of the Remuneration Regulations regarding their participation in a meeting via means of communication and regarding the adoption of a resolution without convening and Section 6(a) of the Remuneration Regulations with regard to reimbursement of expenses, shall also apply with regard to Naomi and Sharon. - a. Meeting the FFO target** – An operational parameter based on meeting the FFO target set forth in the Company's annual work plan, as shall be approved by the compensation committee and the board of directors during the first quarter of each year for which the Measurable Bonus is granted (the "FFO Target").

A prerequisite for receiving this component of the bonus is meeting 90% of the FFO Target. The CEO's eligibility for the bonus shall be calculated in a linear manner in accordance with the extent to which the FFO Target is met, whereby for fully meeting the FFO Target the CEO shall be entitled to a bonus in the sum of 2 times the monthly cost of employment.

- b. Meeting the NOI target** – An operational parameter based on meeting the NOI target set forth in the Company's annual work plan, as shall be approved by the compensation committee and the board of directors of the Company during the first quarter of each year for which the Measurable Bonus is granted (the "NOI Target").

A prerequisite for receiving this component of the bonus is meeting 90% of the NOI Target. The CEO's eligibility for the bonus shall be calculated in a linear manner in accordance with the extent to which the NOI Target is met, whereby for fully meeting the NOI Target the CEO shall be entitled to a bonus in the sum of 4 times the monthly cost of employment.

To clarify, in any event, the total amount of the Discretionary Bonus together with the Measurable Bonus to the CEO shall not exceed the amount of 9 times the monthly cost of employment of the CEO.

According to the current compensation policy, should it transpire, in retrospect, that the figures on which the Company relied at the time of granting the annual bonus are incorrect, and that restatement thereof in the Company's financial statements is required, then the CEO shall return to the Company the gap between the sum of the bonus that was paid to him based on the said incorrect figures and the sum of the annual bonus to which he is entitled based on the figures after their said restatement.

- C.** In July 2019, Azrieli Data Centers LLC., an (indirectly) wholly-owned subsidiary of the Company (the "**Buyer**") entered into an investment agreement (the "**Agreement**") with Compass Holdco, LLC, a Delaware corporation ("**Compass**"), and in an operating agreement with the unit holders in Compass (the "**Unit Holders**" and the "**Operating Agreement**", respectively). The main business of Compass is data centers in North America. Compass owns active sites and additional sites under construction and development. The said transaction, in which the Buyer made an investment in the unit capital of Compass, was closed and the consideration therefor was paid by the Buyer to Compass.

The Buyer had invested in Compass' equity and is holding approx. 20% of the unit capital of Compass (the "**Initial Investment**"). The Buyer has an option to make additional investments and increase its holdings in Compass up to approx. 33% according to a price per unit in the Initial Investment. The Agreement includes standard representations and indemnity clauses for agreements of this type.

At the closing of the transaction and in accordance with the provisions of the Agreement, the Buyer paid Compass the sum of approx. U.S. \$135 million for the Initial Investment. The Company financed the transaction from internal sources.

Note 6 – Subsequent Events

C. (Cont.)

Compass, the Buyer and the Unit Holders entered into an operating agreement, which governs the relationship between them and includes, inter alia, provisions in connection with the appointment of directors in Compass, resolutions requiring the unanimous consent of the Unit Holders, separation mechanism and the manner of injection of capital into Compass.

D. On July 25, 2019, Canit Hashalom Investments Ltd., a wholly-owned subsidiary of the Company (the “**Seller**”), together with Granite, entered into an agreement (the “**Agreement**”) with Elco Ltd. (the “**Buyer**”), which is a third party independent of the Group, for the sale of the Seller’s full holdings (100%) in Granite to the Buyer (the “**Transaction**”).

In consideration for the Seller’s full holdings in Granite, the Buyer shall pay the Seller the sum of NIS 1,017 million, minus the net financial debt of Granite, Supergas and its subsidiaries as of the closing date (which is estimated, as of October 31, 2019, at approx. NIS 250 million) (the “**Consideration**”). The Buyer paid to the Seller the sum of NIS 10 million, as an advance on account of the Consideration. Insofar as the Transaction is not closed by October 31, 2019, the Buyer shall pay the Seller another NIS 40 million on account of the Consideration. On the closing date, the Buyer shall pay the Seller the balance of the Consideration, net of NIS 250 million (the “**Deferred Consideration**”). The Deferred Consideration amount shall be paid by the Buyer to the Seller in 7 unequal annual installments, starting 12 months after the closing of the Transaction contemplated in the Agreement.

The Transaction excludes all of Granite’s holdings and assets that are not Supergas, its subsidiaries and assets related to any of them, and further excludes liabilities that are not attributed to Supergas and the subsidiaries of Supergas (the “**Excluded Assets**”).

To secure the Deferred Consideration payments, the Buyer shall pledge to the Seller, in a first ranking fixed charge, 80% of the share capital of Supergas, which rate shall be gradually reduced according to the mechanism set forth in the Agreement.

The Agreement includes several closing conditions, primarily receipt of the approval of the Competition Commissioner, the approval of the Ministry of National Infrastructures, Energy and Water and/or the Natural Gas Authority and third party approvals.

On August 5, 2019, the approval of the Competition Commissioner, which was one of the closing conditions of the transaction, was received.

Note 6 – Subsequent Events

D. (Cont.)

The parties intend to close the Transaction by October 31, 2019. However, insofar as not all regulatory approvals included in the closing conditions of the Agreement are received by such date, the period of time for the closing of the Transaction shall be automatically extended until December 31, 2019. Insofar as the said approvals are not received even by such date, each one of the parties shall be entitled to extend the period of time for closing of the Transaction until March 31, 2020.

Until the closing date, the Agreement may be terminated by mutual consent, or due to the non-closing of the Transaction within the time frames set forth as aforesaid, or in the event of a breach or material undertaking that was not remedied, or in the event of receipt of a final order or instruction that limit the closing of the Transaction or implementation of its material provisions.

The Agreement includes representations as customary in transactions of this kind, as well as a mechanism for indemnification of the Buyer for, *inter alia*, breach of representations & warranties by the Seller, as well as liabilities in connection with the Excluded Assets.

In the Company's estimation, the Transaction, if and to the extent closed, is expected to have a material effect on the Company's results. Insofar as the Transaction is closed by October 31, 2019, the Company will record an estimated (after tax) profit of approx. NIS 355 million.

In view of the closing conditions of the transaction, and in view of the possibility available to the parties to terminate the Agreement under certain conditions, there is no certainty as to the closing of the Transaction contemplated in the Agreement. Furthermore, even if the Transaction is closed, there is no certainty as to the closing date.

Dear Sir/Madam,

Re: Special report for review of the separate interim financial statement pursuant to Regulation 38D of the Securities Regulations (Periodic and Immediate Reports), 5730-1970

We have reviewed the separate interim financial statement, which is presented according to Regulation 38D of the Securities Regulations (Periodic and Immediate Reports), 5730-1970, of **Azrieli Group Ltd.** (the "**Company**") as of June 30, 2019 and for the six- and three-month periods then ended. The separate interim financial statement is the responsibility of the Company's board of directors and management. Our responsibility is to express a conclusion on the separate interim financial statement, based on our review.

We have not reviewed the separate interim financial statement from the financial statements of Investee Companies, the total investments in which amounted to approx. NIS 412 million as of June 30, 2019 and the profit from such Investee Companies amounted to approx. NIS 42 million and approx. NIS 11 million for the six- and three-month periods then ended, respectively. The financial statements of these companies were reviewed by other accountants whose reports were furnished to us and our conclusion, in so far as it relates to the financial statements for such companies, is based upon the review reports of the other accountants.

Scope of Review

We conducted our review in accordance with Review Standard 1 of the Institute of Certified Public Accountants in Israel – "Review of Interim Financial Statements by the Auditor of the Entity". A review of separate interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Generally Accepted Auditing Standards in Israel, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review and on the review reports of the other accountants, nothing had come to our attention that causes us to believe that the accompanying separate interim financial statement has not been prepared, in all material respects, in accordance with the provisions of Regulation 38D of the Securities Regulations (Periodic and Immediate Reports), 5730-1970.

Effectiveness of Internal Control over the Financial Reporting and Disclosure

Part D

ATTACHED HERETO IS A QUARTERLY REPORT ON THE EFFECTIVENESS OF INTERNAL CONTROL OVER FINANCIAL REPORTING AND DISCLOSURE PURSUANT TO REGULATION 38C(A):

The management, under the supervision of the Board of Directors of Azrieli Group Ltd. (the "Corporation"), is responsible for setting and maintaining proper internal control over financial reporting and disclosure at the Corporation.

For this purpose, the members of management are:

1 | Eyal Henkin, CEO

2 | Irit Sekler-Pilosof, CFO

3 | Ran Tal, VP, General Counsel and Corporate Secretary

4 | Yair Horesh, Chief Comptroller for Accounting and Financial Statements

Internal control over financial reporting and disclosure consists of controls and procedures existing at the Corporation, designed by, or under the supervision of, the CEO and the most senior financial officer, or by anyone actually performing such functions, under supervision of the Board of Directors of the Corporation, and which are designed to provide reasonable assurance regarding the reliability of the financial reporting and the preparation of the reports according to the provisions of the law, and to ensure that information which the Corporation is required to disclose in reports released thereby according to the law is gathered, processed, summarized and reported within the time frames and in the format set forth by the law.

Internal control includes, *inter alia*, controls and procedures designed to ensure that information which the Corporation is thus required to disclose, is gathered and transferred to the management of the Corporation, including the CEO and the most senior financial officer, or anyone actually performing such functions, in order to enable the timely decision making in reference to the disclosure requirements.

Due to its inherent limitations, internal control over financial reporting and disclosure is not designed to provide absolute assurance that misrepresentation or omission of information in the reports is avoided or discovered.

In the quarterly report regarding the effectiveness of internal control over financial reporting and disclosure, which was attached to the quarterly report for the period ended on March 31, 2019 (the "Most Recent Quarterly Report on Internal Control"), the internal control was found to be effective.

Until the report date, no occurrence or issue were brought to the knowledge of the Board of Directors and the management, which may change the evaluation of the effectiveness of the internal control as found in the Most Recent Quarterly Report on Internal Control.

As of the report date, based on the Most Recent Quarterly Report on Internal Control, and based on information which was brought to the knowledge of the management and the Board of Directors as aforesaid: the internal control is effective.
